

Make sharing vehicles across your organisation easier

Fleetshare
Minimise costs by maximising efficiencies

Cars that are individually allocated to a driver are often left idle in a car park for significant periods of time. By making these vehicles available for others to use, your fleet can become more efficient.

FleetShare is a web-based pool management system that is simple to use but gives you the power and flexibility to customise functionality to meet your requirements.

The calendar-based reservation system allows you to book and manage multiple vehicles across multiple locations. You have the ability to set approval triggers, capture purpose of trip, make recurring bookings, assign costs to each trip the vehicle makes, and charge back costs to the appropriate cost centre.

You can choose from a variety of solutions for key management, from self-serve to networked key safes or keyless entry . FleetShare also integrates with Custom Fleet's telematics solution, FleetTrak™, to automatically update kilometres driven from each trip for cost reporting.

We work closely with you to develop, implement and manage a customised solution that is right for you to ensure you optimise fleet utilisation to run your business effectively and efficiently at the lowest possible cost.

Self-service Bookings

The user-friendly online booking system makes it easy for your employees to manage their own bookings. The check in/ out system for vehicles is simple and intuitive for them to use.

Unattended Key Safes or Keyless Entry

Our networked key safes mean that keys to the vehicles are safe and secure. Alternatively, access to vehicles via keyless entry is also available. Both of these options provide your employees with 24/7 access to company vehicles.

Streamlined Management

The charge-back capabilities make it simple to itemise trips, allocate usage and apply to the relevant cost centres

- Increase vehicle utilisation
- Book and manage multiple vehicles across multiple locations
- Vehicle specific charge rates – assign costs to each trip

Leasing options designed around you and your business

Custom Fleet offers a number of options to ensure the 'best fit' with your needs:

Fully Maintained Operating Lease

Custom Fleet retains ownership of the vehicle and your monthly lease rate includes all servicing and maintenance costs, such as repairs, registration, tyres and accident management. Non-maintained options are also available for those wanting to take a more 'hands on' approach.

Finance Lease

A structured finance lease provides you the flexibility of setting an agreed residual value over the set term of your choice. You can also choose the maintenance option that best suits your needs. At the end of the term we can assist with disposal or retention of the asset.

Sale and Leaseback

If you currently own your fleet, Custom Fleet will buy your vehicles, then lease them back to you on a finance arrangement where possible and work with you to provide any new vehicles required. This can provide your business with an additional capital injection and seamless changeover from vehicle ownership.

nEXt Lease

We offer a wide range of previously leased vehicles under a fully maintained operating lease. This is an attractive option if you are seeking affordable lease rates and the possibility of FBT savings.*

Custom fleet value-added services

We can help you leverage your business further with:

Vehicle Purchasing Options on Ex-lease Vehicles

For your staff and their families. With over 60,000 vehicles under management in Australia, we have a vehicle to suit most needs.

Heavy Commercial Leasing and Finance Options

Combine your heavy commercial asset management under one fleet management supplier. We offer medium and long term operating and finance leases on trucks, forklifts and other heavy commercial vehicles.

Fleet Management Services

Choose whether you would like to build a fully maintained option into your leases or attach a fleet management service and pay for maintenance as you go, using the buying power of Custom Fleet. Fleet management services are also available for your owned assets.

Fleet Cards

We save you time and money by providing access to discounted fuel prices and centralising your fuel transactions on your monthly lease invoice.

- Driver Training
