

# Repairs and maintenance

Keeping your fleet and your business running smoothly

## Looking to keep costs to a minimum without compromising fleet or business efficiency?

Our superior buying power and experience in advanced fleet logistics means you have a strategic partner that can help keep your fleet in great shape at a manageable cost.

### Maintaining standards across your fleet

Any maintenance work must be assessed and authorised by our service control consultants. Our team of qualified mechanics ensure only appropriate maintenance and servicing is performed, and that it's in line with industry guidelines. This means reassurance of a high standard and quality of work, and takes the worry out of every repair.

### Servicing made easy

We make it easy for you and your drivers to manage servicing their vehicles. We have in excess of 6,000 dealerships and repair centres nationwide which you can take the vehicle to. All your drivers need to do is tell the dealer it's a 'Custom Fleet' vehicle and they'll take care of the rest.

### Replacing tyres, windscreens and batteries

We've negotiated preferential rates with several retailers to help you ensure replacement tyres, windscreens and batteries are of the correct specifications, and that only original parts are used.

### Registering fleet vehicles

We can arrange vehicle registrations on your behalf as part of our fleet management service.

To find the nearest service centre, visit [customfleet.com.au](http://customfleet.com.au) or ask your Custom Fleet specialist.
