Vehicle Sanitisation Service – With Rentokil

Enhancing hygiene within all fleets

Rentokil Technicians follow carefully assessed safety measures their safety and the safety of the general public is of paramount importance to us.

- Sanitisation of soft fabrics, carpets and headlinings with the use of misting equipment
- Disinfection of all touch points that include internal hard surfaces and external door handles with antibacterial, sanitising wipes
- Microfibre cloth used to remove any remaining residual

Service preparation and procedure

- Rentokil's Specialist Disinfection team will attend your site to carry out the treatment
- The vehicle is to be left in park and with the handbrake and ignition on
- Air Conditioning is turned on and set to mid level heat
- Internal recycle option must be selected to ensure that all air conditioning ducts are flushed and disinfected
- Misting application times are calculated based off the cubic area of the vehicle
- The doors are then closed and air allowed to circulate for a period of 5 minutes
- Doors are opened and car ventilated
- Hard surface and touch point wipe down is completed
- Disposable seat cover is placed on Drivers seat to enable immediate use of the vehicle, Additional seats can be covered if required.

What is sanitisation misting?

Extremely small droplets of a disinfectant settle on inaccessible areas to enable even dispersal and maximum coverage.

What industry types are we servicing?

- All Corporate and Government Fleets
- Commercial fleets
- Taxis
- Ride share providers
- Buses

What PPE is worn by our Rentokil Technicians?

Appropriate PPE for the specialised services are worn by Rentokil Technicians. These include gloves, masks, boots and coveralls.
